Thomson Reuters Data Privacy Advisor

Trusted answers to help deepen your
expertise so you can proceed more confidently.

The intelligence, technology and human expertise
you need to find trusted answers.

the answer company™

THOMSON REUTERS®

Introducing Data Privacy Advisor.

The number of jurisdictions with data protection or privacy legislation in place has soared in the last decade with no signs of abating.

In the E.U., an overwhelming patchwork of new rules and regulations governs the use of personal data. In the U.S. and elsewhere, countless changes loom.

So how can you understand all the implications for your organisation?

Data Privacy Advisor combines best-in-class content including data privacy guidance from Practical Law; global legal and regulatory information; and news and current awareness to help you monitor the market, identify which rules and regulations to apply, and detect, prevent, and respond to data privacy issues. All with a system that gets smarter the more you use it.

Only Data Privacy Advisor combines Practical Law know-how, global legal and regulatory content, and artificial intelligence from Thomson Reuters and IBM Watson® to help you proceed with confidence.

What is Data Privacy Advisor?

Data Privacy Advisor helps you to better understand global rules and regulations so you can define clear and concise policies; prevent, respond to, and protect against data privacy issues; and provide strategic data protection guidelines to leadership. Using Data Privacy Advisor, you'll better understand and manage the data protection requirements and issues in the jurisdictions where your company does business.

With Data Privacy Advisor, you can:

Get relevant answers to your data privacy research questions

Be alerted to compliance-related news and trends in time to act

Feel assured your research is more complete

Understand regulations easily across jurisdictions

Know your data privacy compliance requirements

Collaborate with colleagues by sharing research folders

*Ask Watson a Question is a next-generation-answering feature that is in beta. Thomson Reuters Center of Cognitive Computing and IBM Watson partnered to build the world's first question-answering feature for a global privacy compliance. It is a "learning system," meaning the feature continues to get smarter with user interaction.

Thomson Reuters
